Work Experience

TATA 1mg (*Software Development Engineer*) **March 2025 - Present**

- **Led a team of 5** to transition the **checkout architecture** from **RxJava to Kotlin Coroutines + Flow**; achieved **27% faster TTID** and **19% lower heap usage**, improving async reliability and lifecycle safety.
- Built an **offline-first delivery workflow** for the Rider app using **Room persistence**, **state queues**, and **WorkManager-based deferred sync/uploads**; enabled operation in low-connectivity areas and improved **last-mile delivery reliability**.
- **Migrated** the customer app UI to **Jetpack Compose**, introducing **modular UI architecture** across **3 modules** to improve code reusability, reduce UI complexity, and accelerate feature development.
- Developed a **wearable health-data SDK** using **Spike SDK**, enabling insurer integrations and delivering a **30% increase in wellness engagement**.
- Integrated **EMI payments via Juspay SDK**, expanding payment flexibility and contributing to a **19% revenue uplift** from high-value transactions.

BluSmart (*Android intern*) [Certificate] **September 2024 - March 2025**

- Built a **server-driven ad rendering engine** in **Kotlin** supporting **video and carousel formats**, enabling server-controlled monetization and generating **₹5 lakh/month per-ad revenue**.
- Redesigned **subscription purchase flows** using **MVVM + REST orchestration**, reducing friction in checkout and achieving **15% growth in Blu-Elite subscriptions** and **20% higher subscription revenue**.
- Launched the **Refer & Earn system** for the **BluSmart rider app** using **deep links + backend coupon validation**, increasing **user acquisition by 35%** and boosting **referral-driven installs by 50%**.

MyFab11 (*Android intern*) [Certificate] **January 2023 - May 2023**

- Built a **backend-controlled tooltip system** using **MVVM architecture**, enabling server-driven UI updates and reducing **code redundancy by 30%**, improving maintainability and release flexibility.
- Integrated the **Truecaller SDK** to automate user verification, reducing **manual verification time by 40%** and increasing **new user sign-ups by 25%**, contributing to higher onboarding conversion.

Education

Indian Institute Of Information Technology (IIIT), Una Una, Himachal Pradesh, India
Bachelor of Technology, Computer Science and Engineering ***December 2020 - September 2024***

Technical Skills

Languages:	C, C++, Kotlin, Java, Python.
Database:	SQL, MongoDB.
Android:	Android SDK, Jetpack Compose, XML, MVVM, Coroutines, Retrofit, Live Data, State Flow, Room DB, Data Binding, Hilt, Android UI components, JSON.
Developer Tools:	Android Studio, VS Code, Firebase, AWS, Postman, Linux, Git, GitHub.
Relevant Coursework:	DSA, DBMS, OS, OOP.
Coding Profiles:	CodeChef Highest rating: 1732, 300+ questions solved on GeeksForGeeks and LeetCode.

Projects

ExitPro | *XML, Kotlin, Node.js, Express.js, MongoDB* Play store | Demo-Video | Android | Back-end

- Built a **Node.js + Express backend** with **MongoDB Atlas** and **Mongoose-based data modeling**, reducing **data access latency by 30%** and improving maintainability via modular architecture, cutting **debugging time by 40%**.
- Implemented a **multi-factor authentication system** combining **fingerprint verification** and **OTP validation**, achieving **95%** entry accuracy and reducing unauthorized access attempts by **80%**.
- Developed a **barcode-driven entry/exit automation system** with **Retrofit-based API sync** and **RecyclerView log rendering**, increasing processing efficiency by **70%** and reducing wait times by **50%**.

Leafify App | *Java, XML, Android Studio, TensorFlow* github.com/sayak22/leafify

- Built a Java-based Android app for leaf health classification (Healthy & Diseased) with an **accuracy of 95%**.
- Optimized **TensorFlow Lite** usage, reducing prediction latency by **20%** and improving overall application responsiveness.

Achievements

- Secured **Global Rank 3449** among 10K+ participants in **Google HashCode 2022** [Certificate].
- **Published** 1 app(s) on the **Play Store** [Play Store developer profile].
- Finalist in **Technizibition** at **Cognizance 2021**, the tech fest of **IIT Roorkee**, among 150+ participants [Certificate].

Leadership Experience

- **Founded** and **led** the sports club of IIIT Una, **Zenith**, overseeing activities of 10+ sports. **September 2023 - Present**
- **Directed** IIIT Una's event club, **EPMOC** as a **secretary**, organising 5+ new events. **December 2021 - October 2022**
- **Captained** the institute football team of **IIIT Una** at the **6th inter-IIIT sports meet 24'**.
